HOW PRICING WORKS

Simple, scoped, and predictable

Every RazaPro package is built around three things: how many transactions run through your books each month, how many states you file sales or payroll tax in, and how many people are on payroll. Pick your services, land in a tier, and that's your price — no hidden setup fees, no surprise invoices for a normal month.

The 20% rule. A little month-to-month variation is normal and never triggers a change. If your business settles into a higher tier — for example, 6 employees becomes a steady 8, not a one-off — your plan moves to the next tier or add-on rate. You'll always know in advance, never find out on an invoice.

WHAT EVERY BOOKKEEPING PLAN INCLUDES

01 Monthly reconciliation & categorization

Every transaction categorized and every account reconciled each month, inside the accounting software you already use.

02 Monthly financial reports

A profit & loss statement and balance sheet generated from your maintained books every cycle — a real financial picture, not a spreadsheet of transactions.

03 Year-end, tax-preparer-ready books

Reconciled accounts, categorized income and expenses, and a clean year-end close, organized so your CPA or tax preparer can file directly. This does not include preparing or filing the tax return itself.

BOOKKEEPING

Priced by transaction volume, nothing else

Bookkeeping-only pricing scales with how many transactions move through your accounts each month — deposits, payments, transfers, card swipes, all of it. Up to 5 financial accounts are included at every tier.

01	Starter Up to 150 transactions per month. Right for most single-owner service businesses and early-stage companies.	\$75 PER MONTH
02	Standard 151 – 300 transactions per month. Right for a growing business with more regular vendor and customer activity.	\$100 PER MONTH
03	Growth 301 – 500 transactions per month. Right for a busier operation with higher transaction counts across multiple accounts.	\$120 PER MONTH

Above 500 transactions a month? That volume is priced individually after a short review of your books, so the price reflects the actual work involved.

BUNDLED PACKAGES

02	QuickBooks Online Setup Company file setup, chart of accounts configured for your business, bank and card feeds connected, opening balances entered, and access configured for the engagement.	From \$99 ONE-TIME

WORKED EXAMPLE

What a real bill looks like

A business with 240 transactions a month, selling in 3 states, running payroll for 8 people in 1 state:

Complete Package · up to 300 transactions	\$150
+ 2 additional sales tax states × \$10	\$20
+ 3 additional employees × \$8	\$24
Rounded down to the nearest \$10	-\$4
Total monthly price	\$190

This is exactly how your quote is built. No percentage markups, no vague "custom pricing" — just the base package plus whatever goes beyond it, added line by line.

CLEAR SCOPE, NO SURPRISES

What's included, and what isn't

RazaPro is a bookkeeping and tax-support service, not a CPA firm — knowing exactly where that line sits protects you as much as it protects us.
